

iPillow

The Anti-Bed Bug Pillow is a life changing invention! It is a very comfortable anti-bed bug pillow. This amazing invention is usually used on farms because there are many bugs in the fields. This pillow has been laboratory tested and is endorsed by the A.S.A. (American Sleep Association). Unfortunately, these cool pillows

only come in white. The bed bug pillow is very simple to use. You just put it on your bed and the bed bugs run away! It is very easy and useful!

If you like that invention, I know you will find the iPillow irresistible! The iPillow is a bed bug and mosquito free device! It comes with an iPod nano already programmed with twenty lullabies. The best part of this pillow is that it comes with a bed bug free mattress cover! Since the pillow is huge, it comes with a space bag to suck out the air, which is perfect for traveling!

Unlike the Anti-Bed Bug pillow, this one comes in a variety of colors. For instance, the pillow has five background colors to choose from such as: yellow, pink, purple, red and gray with decorated black and white peace signs. For boys, the pillows come in green, orange, blue and brown backgrounds, but the decorations are soccer balls in black and white. For adults, the pillows come in solid colors like red, black, grey and white! Believe it or not, there are iPillows for little babies! These come in blue, pink and white.

All iPillows come in large sizes, but since it comes with a space bag, you can reduce the size by 95%! The iPillow is an amazing invention for all the family to enjoy! Even a little baby can have one because the repellent is not toxic. I am sure you will love this product and if you buy one you will get another one for half the price!
